Rails
Rake in Rails

Quick Review

```
rake -T  # lists all tasks
```

Custom Tasks

code in ./lib/<name>.rb

tasks in ./lib/tasks/<another name>.rake

Create Modules

```ruby
module CustomerImporter

  def self.import(count = :all)

    cust_count = 0

    puts 'Starting customer import...'

    # do the import work...

  end

end
```

New Task

```ruby
namespace :utilities do

  desc 'Imports our customers'

  task :import_customers => :environment do

    CustomerImporter.import(args[:count])

  end
```

Now Use

`rake utilities:import_customers`

Your Turn

```
rake cards:serve_cards

rake cards:play_war
```
